

Growing Research Access for Nationally Transformative Equity and Diversity (GRANTED)

National Science Foundation

GRANTED supports ambitious ideas and innovative strategies to address challenges and inequities within the administrative research support and STEM training infrastructure particularly at emerging and minority-serving institutions of higher education.

GRANTED Themes:

Enhancing practices and processes within the research enterprise.

Developing and strengthening human capital within the research enterprise.

Translating effective practices related to the research enterprise into diverse institutional and organizational contexts through partnerships with professional societies and organizations.

GRANTED Funding Will:

- ✔ **Advance** transformation of the national research enterprise.
- ✔ **Generate** scalable models that mitigate structural barriers and expand research capacity and competitiveness.
- ✔ **Create** new and authentic collaborations, partnerships, and communities centered around strengthening the Nation's research enterprise.
- ✔ **Diversify** the project leadership, institutions, ideas, and approaches that NSF funds.
- ✔ **Broaden** participation in the Nation's research enterprise.
